## Projects

### Boss Wear Group (Frontend Development)

Developed complete responsive frontend for the Boss Wear Group website. Converted PSD designs into pixel-perfect HTML/CSS layouts. Implemented interactive elements using JavaScript for better user experience.

### Pasha Sports (Frontend Development)

Built fully responsive frontend for Pasha Sports website from PSD designs. Ensured cross-browser compatibility and mobile optimization. Added interactive features like navigation menus and sliders using JavaScript.

### Personal Portfolio Website (Full Stack in Progress)

Designing a complete portfolio website showcasing projects and skills. Currently developing frontend using HTML, CSS, and JavaScript. Backend integration with database planned for contact form and project management.

### Complete Full Website (Frontend + Backend + Database) – Upcoming

Developing a full-featured website with responsive design, interactive frontend, and backend database integration.

Built using HTML, CSS, JavaScript, and backend technologies (PHP/Node + MySQL).

Live version to be launched in 1-2 weeks.

## Experience

2023 – Present

### Junior Web Developer (Academic & Personal Projects)

Developed responsive websites using HTML and CSS

Converted PSD designs into pixel-perfect frontend layouts

Implemented basic JavaScript for UI interactions and form handling

Worked with basic backend and database integration (PHP/Node + MySQL)
